Tougaloo College Mathematics and Computer Science Department
Faculty Evaluation Summary

Faculty Name: Dr. Xiuquan Wang
Hire Date: August 2015
Department: Mathematics & Computer Science

Evaluation Date: March 28, 2016
Evaluator: Sharron Streeter
Division: NSD

Position
- ☐ Tenured
- ☑ Tenure Track
- ☐ Non-tenure Track

Evaluation Year ☑ 1, ☐ 2, ☐ 3 ☐ ___

Rank
- ☐ Professor
- ☐ Associate Professor
- ☑ Assistant Professor
- ☐ Instructor

I. Teaching Effectiveness

a. Presentation Format and Skills (attached)
b. Classroom Climate (attached)
c. Variety and pacing of instruction (attached)
d. Student Relationships and Advising

	High 5	4	Avg. 3	2	Low 1	N/A
Assists advisees in formulating educational and career goals			X			
Maintains up-to-date folder on each advisee			X			
Provides assistance in resolving problems involved in the educational experience		X				
Maintains office hours		X				
Performs registration duties as assigned		X				
Sponsors student activities			X			
Supervises student projects/presentations			X			

II. Professional Achievement and Academic Growth

	High 5	4	Avg. 3	2	Low 1	N/A
Develops/implements pertinent research		X				
Participates in grant writing activities			X			
Presents papers or performs creative, scholarly works		X				
Publishes articles, papers or other endeavors						
Demonstrates a positive, significant impact on educational programs		X				
Serves on and/or provides services to local, state, national committees, organizations or boards.		X				
Outreach to businesses, local, state and community groups			X

Tougaloo College Mathematics and Computer Science Department
Faculty Evaluation Summary

Faculty Name: Dr. Xiuquan Wang	Evaluation Date: March 28, 2016
Hire Date: August 2015	Evaluator: Sharron Streeter
Department: Mathematics & Computer Science	Division: NSD

Evaluator's Comments:

Dr. Xiuquan Wang is making excellent progress in his first year at Tougaloo College. He has taken the initiative to get involved with activities in the department and division. He has established personal relationships with most of the members of the department. He has sought out external faculty development through the local chapter of the MAA Louisiana/Mississippi and was selected as a Section NExT Fellow. He is also actively pursuing funding for research and has presented a paper this year.

Areas of Improvement: **(1)** Committee assignments **(2)** Advising and student activities **(3)** Submitting reports in a timely manner

Based on review of the faculty portfolio, faculty and student evaluations, I recommend Dr. Xiuquan Wang for reappointment for the 2016 - 2017 academic year.

Evaluatee's Comments:

Evaluator Date April 25, 2016

Evaluatee Date

Note: A faculty members' signature above does not necessarily constitute agreement with the rating. It does verify that the document has been reviewed and discussed with the evaluatee. The faculty member may provide written comments to be attached to the official copy of the evaluation.

Hire Date: August 2015	Evaluator: Sharron Streeter
Department: Mathematics & Computer Science	Division: NSD

Peer Review Performance Notes - **Observation date: 02/10/2016**
Course: **MAT22101 Calculus I**
Reviewers: **Sharron Streeter**

1. *Presentation Format and Skills.*

Dr. Xiuquan Wang began class promptly at 8:00. Before starting class Dr. Wang put some reminders on the board. He stressed that Exam 1 would be on Friday gave an outline of what topics would be covered. Dr. Wang had given a take home practice test and for the majority of the class reviewed problems as requested by the students.

During the review Dr. Wang prompted the student who asked for the problem to give the next step in solving the problem. If the student got stuck he encouraged other students to assist. Most of the students were paying attention and taking notes. After completing a solution one student found a mistake. The instructor responded positively and thanked the student for finding the mistake.

A student asked Dr. Wang to redo a problem that had already been covered. Instead of being negative toward the student he did the problem again without hesitation. He took the opportunity to present the solution again in more detail using a graph for a fuller explanation.

2. *Classroom Climate*

Most of the students were actively engaged and taking notes. The atmosphere was serious with students joining in the conversation at will. The classroom climate was excellent. The class was about 15 – 20 students and during the course of the lecture the instructor called on some students by name. The class was interrupted by someone outside of the class. It was handled smoothly.

Professor Wang encouraged the students to be on time especially on Friday for the test. He warned them that they may not have enough time to finish the test if they are late.

3. *Variety and pacing of instruction*

Dr. Wang was effective in his technique of presenting the solutions. The study guide gave a variety of problems in preparation for the exam. Students seemed to be able to understand and voice volume was very good. He gave the students ample time to respond and did not rush. Where appropriate he referred to previously covered material and emphasized application of the rules. It was clear that a significant amount of planning and time was spent preparing for the course. Professor Wang reminded students of key terms. He stopped frequently to check their understanding. When a problem got to a form that was easily

Hire Date: August 2015	Evaluator: Sharron Streeter
Department: Mathematics & Computer Science	Division: NSD

solvable he let the students finish it on their own. He also connected current material to material that they would cover later in the semester. Dr. Wang chose a problem himself from the study guide that he felt was difficult but no student had requested. He wanted to see if the students were actually able to solve it.

4. *Suggestions for improvement:*

- Dr. Wang has very good teaching technique and should encourage more students to participate in discussion.
- Allow students to work problems at their desk when appropriate and walk the aisle and give feedback
- Use Faculty Development Center and other resources to stay current.

Peer Review Performance Notes – **Additional Reviewers**

1. **Reviewer: Professor Fatissa Allen**

   Dr. Xiuquan Wang promptly started his lecture for MAT 104 (Trigonometry) at 11 a.m. The objectives for the lecture were clearly stated. His voice was clear and easily heard. His lecture was coherent. It included many relevant examples that supported the objectives. When the student asked a question, Dr. Wang took time to give a meaningful and relevant response. The students seem to follow the lecture. I think Dr. Wang is well respected by his students.

   .

2. **Reviewer: Dr. Nimr Fahmy**

   I have had the opportunity to observe Dr. Wang teaching Calculus IV Course (MAT 322) offered at Tougaloo College during the Spring of 2016. Dr. Wang believes that students should be actively, not passively, involved in a classroom lecture. Each and every student participated at least once during the class. The students were enthusiastic about the learning process-volunteering to answer all questions, while posing several of their own.

   At the beginning of the class he gives students an outline of the discussion so that they can concentrate and participate in what was being said rather than taking copious notes. I was especially impressed by the way he answered the questions and inspired the students to participate. During the class period he developed a reasonable amount of material theorem and examples. The class was very smooth, and excellently conducted.

   As a colleague, I consider him a very friendly and respectful person. He is experienced educator with a delightful personality. He is a truly an exceptional professor.
